

How to make DFUMC Home Page a FAVORITE

Once you are on the home page <http://www.daltonfumc.com/Default.asp> go to the top menu bar where it says File, Edit, View, Favorites, and click Favorites.

The drop down menu will have as it's first option "Add to Favorites". Click that.

A box will pop up like this:

Click the **Add** button, and the DFUMC Home Page is now one of your Favorites.

The link will be available by clicking Favorites on the menu bar again, placing the pointer over the text Dalton First United Methodist Church, and clicking it. If your list is long, go to the bottom edge to scroll through a long list.

The link will be at the bottom of your list, so if you want to make it easier to find on a long list, go to the bottom of the list, left click on the Dalton First United Methodist Church text, hold the left button down, and drag it up to the top. A bold line will scroll up the list as you drag it to the top of the list, representing the link. Drop it where you want it. Put it #1..... ☺
